Professional Summary

Backend Software Engineer with 5+ years of engineering experience across backend development, distributed systems, and cloud-native platforms. Specializes in Java, Spring Boot, REST APIs, and event-driven systems. Strong background in performance tuning, distributed processing, and scalable system design.

Experience

Software Developer (Backend) — GUCONS Consulting Pvt Ltd (Jun 2024 – Present)

- Designed and developed high-performance Java/Spring Boot microservices with async processing.
- Built Kafka event-driven components improving throughput and reducing latency.
- Optimized PostgreSQL/MongoDB queries and connection pooling.
- Automated CI/CD with GitHub Actions and Jenkins reducing release time by 40%.
- Implemented reliability patterns including retry logic and structured monitoring.

Freelance Backend Developer / Independent Projects (Aug 2022 – May 2024)

- Built modular microservices and scalable REST APIs for client systems.
- Developed Kafka pipelines using consumer groups, partitions, and idempotent logic.
- Implemented Redis caching layers for performance and reduced DB load.
- Automated deployments using GitHub Actions and AWS services.

Junior Backend Developer — CrogiEs Global Pvt Ltd (Jan 2021 – Aug 2022)

- Developed REST APIs using Java and Spring Boot integrated with SQL databases.
- Improved response time through optimized SQL queries and refactoring backend flows.
- Built reusable backend components for authentication and data validation.
- Automated testing using JUnit, Postman, and Selenium.

Technical Skills

Backend: Java, Spring Boot, REST APIs, Microservices, JUnit

Distributed Systems: Kafka, Redis, Event-Driven Architecture, PostgreSQL, MongoDB

Cloud: AWS, Azure

DevOps: Docker, Kubernetes, Terraform, Jenkins, GitHub Actions

Other: Python, SQL, Linux, Git

Selected Projects

Distributed Transaction Microservice (Kafka, Spring Boot, PostgreSQL)

Designed async transaction pipeline using Kafka consumer groups, retry logic, and idempotency.

Cloud Infrastructure Automation (Terraform, AWS)

Built reusable Terraform modules with automated CI/CD deployments.

Observability for Java Microservices (CloudWatch, Docker)

Implemented distributed tracing, metrics, and SLO-based alerts.

Education

Rivier University, Nashua, NH — M.S. Computer Science (2024)

GITAM University, Visakhapatnam, India — B.S. Information Technology (2022)

Certifications

AWS Certified Developer – Associate

Microsoft Azure Administrator Associate
